Portfolio and live work: [xryaxa.github.io](#) | [nara.az](#) | [linkedin.com/in/rahman-zahidov-a88b3b399](#)

PROFILE	Self taught frontend developer and founder of Nara , a commercial SaaS platform I built and shipped end to end with React.js, Next.js and TypeScript , using an AI assisted workflow (Claude Code) . I have learned by shipping software that real businesses depend on, and I now want to do that inside a professional team, with a mentor, on projects bigger than my own. Available full time.		
TECHNICAL	Frontend	React.js, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS	
	Mobile	Flutter and Dart, one codebase for iOS and Android	
	Workflow	Git, REST API integration, Figma, responsive and multi language UI, debugging	
	AI tools	Claude Code and ChatGPT, daily use for building, debugging and reviewing code	
EXPERIENCE	Founder and Frontend Developer, Nara		Since 2026
	White label platform for meal subscription businesses. nara.az and app.nara.az		
	- Built a multi tenant SaaS from an empty folder to production. One codebase serves every business with its own logo, colours and domain. - Designed the interface in Figma and built it in React.js, Next.js, TypeScript and Tailwind CSS: an operator dashboard and a customer facing storefront, both live at app.nara.az. - Integrated backend REST APIs for subscriptions, deliveries and payments, and built the analytics dashboard covering revenue, subscribers and churn. - Shipped the interface in 3 languages, Azerbaijani, Russian and English, responsive across mobile, tablet and desktop. - Built the iOS and Android app in Flutter from a single codebase. - Work in an AI assisted workflow with Claude Code for scaffolding, debugging and refactoring, and use Git throughout.		
PROJECTS	xryaxa.github.io , my portfolio. Next.js 16, React 19, TypeScript and Tailwind v4, statically exported. Scores 95 or above on Lighthouse performance and 100 on accessibility and SEO. Public repository. Before Nara, 9 complete React and Next.js builds : restaurant and cafe sites, a tour operator site, a meal delivery site. Self directed rather than client work, each one taken to a deployed, responsive finish.		
EDUCATION	MSc, Hydrogeology of Mineral Deposits and Engineering Geology Baku State University, 2026 to present		
	BSc, Geology and Geophysical Engineering, English sector Baku State University, 2022 to 2026, taught and assessed entirely in English		
LANGUAGES	Azerbaijani, native Russian, C2 English, B2, full Bachelor's degree completed in the English sector Turkish, B2
